- Before starting the works, site manager (foreman) will explain the site safety rules to you and draw your attention to the special risks involved in your work.
- I am aware that entry to the site area is only permitted after receipt of safety instruction from the Site Manager (Forman).
- Remember: if you do not act in accordance with the safety rules, you are endangering your working colleagues. When you cause an accident, you are causing damage and pain to a lot of people.
- If you do not know how to carry out a particular task, do not do so before asking how to do it.
- Personal protection equipment - on site you must use personal safety equipment, a hard-hat covering your head, complete and proper tidy clothing, protective shoes, gloves, protective eye-goggles, protective masks while working on cutting and welding, ear-plugs while doing work involving excessive noise, a breathing mask when carrying out work involving harmful dust.
- I am aware that entry into the area of the site is only permitted when wearing suitable clothing, including safety footwear and a protective helmet.
- I am aware that no work must be done before receipt of instruction as to how it is to be carried out.
- I am aware that no equipment and tools can be brought onto the site without the approval of the Works Manager.

Only use working tools that are normal and suitable for the type of work, don't improvise!

- Do not use a tool if you do not know how to operate it. Seek assistance
 - A tool that is not in normal working order must be delivered to the store for repair.
- I hereby confirm that I have received an explanation as to the means of access, location of emergency equipment, safety passageways, location of shafts and a description of the site from the safety aspect (description of safety obstacles and risks).
 - I hereby confirm that I have been given instruction with regard to my profession and job at the site (this instruction/authorization has been given to me by my employer).
 - I am aware that it is my obligation to notify the works manager about any existing defect/risk at the site.
 - I am aware that no work must be carried out which constitutes a danger to others.
 - It has been made clear to me that I am obligated to use of protective equipment according to the risks arising from the work that I am carrying out (protective goggles, earplugs, breathing masks, gloves, protective harness etc).
 - I declare that I am qualified to work at height. A copy of a valid certificate to that effect has been given to the Works Manager.

15. Any work at a height in excess of 2 meters will be deemed to be work at height and I must use equipment in accordance with the safety regulations for working at height.
 - When working at height please ensure that the working platform is of a width of at least 60 centimeters, the platform is securely tied, there is a rail comprising a handhold, a middle rail and a footboard. Ascent to the working platform is with the assistance of a stable and securely tied ladder. No objects must be thrown from height.
 - In places where there is no rail a safety harness must be used and it must be tied to a stable object. A situation must not be allowed to arise when working at height where the employee is not protected from falling.
 - When working on scaffolding a check must be made that the scaffolding is stable, secured to the building and approved for work by the Works Manager of the site.
 - When working on mobile scaffolding, it must be verified that every wheel has a braking device, the upper working platform is bordered by a handrail, a middle rail and a footboard, and there is a ladder of ascent to the working platform, that the scaffolding is stable and approved by the Works Manager.
 - Any place from which it is possible to fall to a depth of more than 2 meters, must be fenced. Any aperture in the floor must be covered or fenced in such a way so that it is not possible to fall into it.
 - Equipment being used for lifting equipment at height must be securely tied to a stable structure and approved by the Works Manager.
 - Use of a ladder - a ladder is designed for ascent and decent from level to level, and no work must be carried out from the ladder itself.
 - Jobs of short duration can only be done with the approval of the Works Manager at the site with an additional person or other means of protection against falling supported by a ladder.
 - At a height of more than 2 meters there must be binding with a safety harness to another point.
16. I am aware that the use of moveable electrical equipment is only to be with equipment bearing double insulation.
17. I am aware that all the plugs and sockets at the site are of industrial model only.
18. I am aware that working on a lifting platform is only permitted by a person possessing a valid driving license.
19. I am aware that excavation works the depth of which exceeds 1 meter will only be done after lining work has been done /suitable protection has been installed and with the approval of the works manager.
20. I am aware that no standing is allowed beneath and/or in close proximity to a load being elevated.
21. I am aware that securing a load to a crane and giving instructions to the crane drive is only permitted by signals.
22. Protection must not be removed from working tools and work must not be carried out with tools from which protection has been removed.
23. Safety installations/railings must not be dismantled without explicit instructions from the Works Manager.
24. Electrical works are only to be carried out by a qualified electrician.
25. No improvised electrical work is permitted.

26. Electrical equipment must be removed to a distance away from a wet area.
27. Safety distance must be maintained of (3, 6) meters from the electricity lines.
28. No electrical works (including the use of electrical equipment), works at height, works in a confined space, are to be carried out without supervision.
29. Mechanical engineering equipment (tractors and bulldozers) and cranes must not be operated without the agreement and approval of the works manager.
30. Equipment and garbage must not be thrown from the building. Removal of waste will be carried out in accordance with the instructions of the Works Manager.
31. Equipment of other contractors must not be used.
32. A clean and tidy working environment must be maintained at all times.
33. Visitors must not be brought on to the site, including advisors and suppliers, without the Work Manager's approval.
34. There must be no work done on /and no wandering about the site under the influence of alcohol and drugs (including prescription medications).
35. Other employees on the site must not be endangered.
36. The eating area must be kept clean and the rest-room cabins stationed on the site must be used.
37. I am aware of the location of the first-aid box on the site.
38. I am aware that no work must be carried out at a location which lacks a railing or an aperture cover.
39. I am aware that heat works must not be carried out without daily approval of the Works Manager and it is my responsibility to ensure that there is properly working fire-fighting equipment in place at the working point.
40. I am aware that no work must be carried out for which there is insufficient lighting.
41. No entry is permitted into excavations whose depth exceeds 1.2 meters, without approval of the Works Manager.
 - Excavation lining must be at such a slope so as to prevent the fall of blocks of earth.
 - Excavation of a depth of more than 2 meters must be fenced-off
42. I am aware that first-aid kits are available on site, and that I am able to use them for assistance.

I hereby sign down that:

1. I have been brought to face all the risks involved in my work on the site and having understood all the topics I have been briefed on and according to the essence of the written information for a new employee, I hereby undertake to follow all the guidelines and safety requirements I am required to do.
2. I undertake to use the personal protective equipment that is provided to me and to replace it in the event of a defect.
